About Elevation Oncology, Inc.

Elevation Oncology is an innovative oncology company focused on the discovery and development of selective cancer therapies to treat patients across a range of solid tumors with significant unmet medical needs. We are rethinking drug development by seeking out innovative, selective cancer therapies that can be matched to a patient's unique tumor characteristics. Our lead candidate, EO-3021, is a potential best-in-class, antibody drug conjugate (ADC) designed to target Claudin18.2, a clinically validated molecular target that can selectively deliver a cytotoxic payload directly to kill cancer cells. We are working to rapidly advance EO-3021 into the clinic in the US across a range of solid tumor indications to demonstrate its potential, as well as exploring other opportunities through new or existing partnerships and business development opportunities to expand our novel oncology pipeline.
